R09: end-to-end timing delta by optimization level
3 seeds per cell, error bars = 95% bootstrap CI over the 3 seed deltas (family-external)
delta of decapsulation mean, ns
(message-zero − message-ones)

optimization level (clang-18, whole-tree same level)
M1 unfixed (liboqs 0.10.0 clangover)
M1 fixed (+982c762)
M5 mlkem-native reference (b3ba7b3)
positive = message-zero slower
negative = message-zero faster
