ECDF — M2 unfixed (pre-fix) / run m2-s2-unfixed
message-zero (class0) vs message-ones (class1) | n = 10000 / 10000
mean delta = +19.126 ns | MDE(alpha=0.05, power=0.80) = 27.299 ns | delta is inside MDE (not distinguishable at this budget)
x-axis clipped at the p99.5 of the two classes (full maxima: 87053 / 85891 ns);
the upper tail is not removed from any statistic
empirical CDF (fraction of samples)
elapsed time of one measured call (ns)
message-zero: n=10000 mean=56767.8 ns median=56669 ns SD=696.2 ns
message-ones: n=10000 mean=56748.6 ns median=56640 ns SD=681.8 ns
