ECDF — M2 unfixed (pre-fix) / run m2-s3-unfixed
message-zero (class0) vs message-ones (class1) | n = 10000 / 10000
mean delta = +9.983 ns | MDE(alpha=0.05, power=0.80) = 19.866 ns | delta is inside MDE (not distinguishable at this budget)
x-axis clipped at the p99.5 of the two classes (full maxima: 78579 / 75953 ns);
the upper tail is not removed from any statistic
empirical CDF (fraction of samples)
