ECDF — M5 reference / run m5-s1-meas
message-zero (class0) vs message-ones (class1) | n = 10000 / 10000
mean delta = -5.596 ns | MDE(alpha=0.05, power=0.80) = 19.034 ns | delta is inside MDE (not distinguishable at this budget)
x-axis clipped at the p99.5 of the two classes (full maxima: 41568 / 41739 ns);
the upper tail is not removed from any statistic
empirical CDF (fraction of samples)
elapsed time of one measured call (ns)
message-zero: n=10000 mean=29225.0 ns median=29105 ns SD=454.2 ns
message-ones: n=10000 mean=29230.6 ns median=29105 ns SD=505.3 ns
