ECDF — M5 reference / run m5-s3-meas
message-zero (class0) vs message-ones (class1) | n = 10000 / 10000
mean delta = -4.819 ns | MDE(alpha=0.05, power=0.80) = 11.722 ns | delta is inside MDE (not distinguishable at this budget)
x-axis clipped at the p99.5 of the two classes (full maxima: 34024 / 35087 ns);
the upper tail is not removed from any statistic
empirical CDF (fraction of samples)
elapsed time of one measured call (ns)
message-zero: n=10000 mean=29321.9 ns median=29275 ns SD=291.8 ns
message-ones: n=10000 mean=29326.7 ns median=29275 ns SD=299.9 ns
