ECDF — R03 M1 fixed (982c762) / control A: valid vs malformed / run r03-m1fixed-s3
valid (class0) vs malformed (class1) | n = 10000 / 10000
mean delta = +0.471 ns | MDE(alpha=0.05, power=0.80) = 23.443 ns | delta is inside MDE (not distinguishable at this budget)
x-axis clipped at the p99.5 of the two classes (full maxima: 82845 / 78256 ns);
the upper tail is not removed from any statistic
